CI-2: RIMS OF ROUNDED JARS WITH BEAD-RIMS
Very common, large and small; sometimes slightly off-set shoulder.

Notes
This is common, but only found in the centre of the area of grog-tempering; not across the Chilterns. It is not in the early dated features at Braughing, although it does appear in the Henderson Collection and in probable late 1st century BC contexts.
C1-2: rims of rounded jars with bead rims.
at Wheathampstead and Brickwall Hill; but it is clear that the form continues, in
grog, well after the conquest and indeed to the end of the 1st century AD; and these
are often still HM.
