G1-8: COPIES GALLO-BELGIC FORM Cam.13, LIKE G1-7 BUT WITH CONCAVE CURVE ON LOWER WALL

Not always possible to distinguish from Gl-7, but the greater concavity may be a sign of later date.

Notes
Like Cam. 12, Cam. 13 is always TN, and perhaps made at Sheepen since it was noted as rare abroad; Cam. 13 & 14, and variants, are very common in Britain. The date range for Cam. 13 is I (just) to IV at Sheepen, and two from Braughing are in a deposit of c.AD 20-50 (Partridge 1981). The dated copies are all post-conquest.
G1-2: copies of the Gallo-Belgic form Cam.2: similar to Cam.1 but with a bulging wall.
